

ARCHITECTURAL
FRAMING
SYSTEMS

A photograph of a four-pane sliding window installed in a brick wall. The window has a dark grey frame and is divided into four equal rectangular panes. The glass reflects the surrounding environment, including a white building and green foliage. The brick wall is made of reddish-brown bricks with white mortar. Above the window is a white architectural ledge.

LIFESTYLE™
SLIDING WINDOW
112 System

AFFORDABLE QUALITY

Lifestyle™ Sliding Windows are ideally suited for residential housing and low rise residential units.

The system allows insect and safety screens to be installed from inside the building, offering extra security and convenience for cleaning. The system uses the latest in window drainage design and incorporates durable sash seals to protect your home from dust and moisture.

The system is engineered to be manufactured in various framing combinations including fixed slide, slide fixed slide and centre bi-part options.

FEATURES:

- Accepts glass thickness from 4mm – 6.38mm
- Various screen options
- Range of heavy duty mullion options for high wind locations
- Range of self draining and heavy duty sill options
- Choice of locking options
- 41mm frame size – able to couple with Lidco's Lifestyle™ Awning/Casement Window (140 System)
- Available in various powder coat and anodised finishes

*Standard sill used
– heavy duty sill available for higher performance

With over 60 years experience in the architectural building industry, Lidco is one of Australia's market leaders in the development, commercialisation and distribution of architectural framing systems.
