ALTO™
# SLIDING/STACKING DOOR
360 System

SUPERIOR DESIGN

Lidco's Alto Sliding/Stacking Door has been developed to provide a quality sliding/stacking door, ideally suited for residential housing, low/medium rise units, hotels and aged care facilities.

The system is designed on the principles of a drain joint to enhance its weathering performance and incorporates durable sash seals to protect your home from dust and moisture. The sash slides on the outside of the frame assisting in superior weathering capability. The perimeter frame incorporates insect and security screens that are located on the inside of the room, particularly popular on multi-storey buildings.

The Alto Sliding/Stacking Door can be manufactured in various framing combinations including fixed-slide, fixed-slide-fixed and centre bi-part as well as three and four panel stacking options. Perimeter framing will couple to all 100mm and 125mm fixed glass framing combinations for continuous floor to ceiling glazing. The system accepts glazing ranging from 4mm to 10.38mm single glazed and 14mm-18mm double glazed without the need of glazing adaptors.

FEATURES:

- Accepts glass thickness from 4mm–10.38mm single glazed and 14mm–18mm double glazed
- Range of heavy duty interlock options for high wind locations
- Range of roller/rail combinations to suit door/glass weights
- Range of self draining and heavy duty sill options
- Subhead and subsill options
- Various screen options
- Self draining sill
- Choice of locking options
- 100mm,125mm,165mm frame sizes
- Available in various powder coat and anodised finishes
- Low rise sill option for non-exposed locations

Optional Flyscreen

Water Rating
200Pa – 100mm standard sill
600Pa – 100mm heavy duty sill*
600Pa – 125mm/165mm heavy duty sill*

*Using subsill
