

ARCHITECTURAL  
FRAMING  
SYSTEMS

**THERMAVIEW™**  
**AWNING/CASEMENT WINDOW**  
**413 System**

## SUPERIOR DESIGN

Lidco's Thermaview™ Awning/Casement Window is ideally suited for residential housing and low rise to medium rise residential units, hotels, offices and commercial buildings.

The system offers the choice of a 65mm frame or the sash can be incorporated into various Lidco Emporia™ commercial shopfront framing systems. The attractive wide face sash is installed using stays and can be operated by a chain winder or wedge-less fastener. Insect and safety screens can be installed from inside the building offering extra security and convenience for cleaning. The system uses the latest in window drainage design and incorporates durable sash seals to protect your home from dust and moisture.

The Thermaview™ system is engineered to be manufactured in a variety of framing arrangements including awning, casement and fixed combinations.

## FEATURES:

- Accepts glass thickness from 4mm–10.38mm single glazed and 14mm–22mm double glazed
