LIFESTYLE™ BIFOLD DOOR
615 System

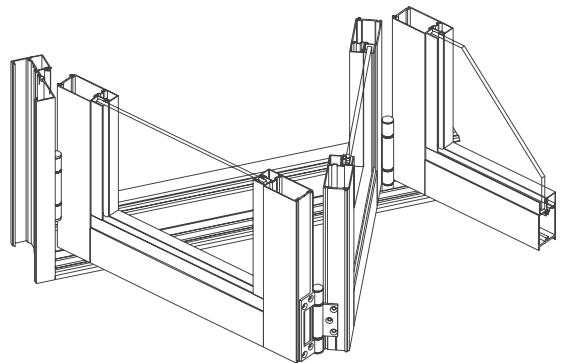

Bifold doors are becoming very popular in today's modern and classical house designs. Multiple door leaves neatly fold back onto each other and stack together on one side of the opening.

Bifold doors enable an entire wall to be opened allowing full access. They are quite often used to merge inside and outside areas. Lidco's aluminium bifold doors have excellent weather performance making them suitable for a variety of applications. Sill options are available to provide a flush appearance but need to be used in areas sheltered from the weather.

Lifestyle™ Bifold Door

Lidco's Lifestyle™ Bifold Door is specifically suited to residential applications where function and improved thermal efficiency are required. The doors accept single and double glazing, providing an affordable quality bifold door that meets current architectural trends and performance requirements.

The Lifestyle™ Bifold Door is ideally suited to residential homes, low rise housing and light commercial applications. Bifold doors are ideal at providing completely open access to courtyards, balconies or patios.

Performance

The system is based on the latest design principles and bifold hardware and incorporates durable sash seals protecting your home from dust and moisture.

The Lifestyle™ Bifold Door is engineered to be manufactured in various combinations including bi-part or single direction operation.

The system accepts glazing ranging from 4mm single glazed safety glass to 22mm double glazed units without the need of glazing adaptors.

Features:

- Accepts glass thickness from 4mm-10.38mm single glazed and 14mm-22mm double glazed
- Self draining sill
- Choice of locking options
- Subsill options
- 100mm frame size - able to couple with all Lidco 100mm frame systems
- Available in various powdercoat and anodised finishes

With over 60 years experience in the architectural building industry, Lidco is one of Australia's market leaders in the development, commercialisation and distribution of architectural framing systems.
